SECTION OF GENERAL, AGRICULTURAL AND INDUSTRIAL MICROBIOLOGY

ACTA MICROBIOLOGICA POLONICA

Series B
Microbiologia applicata

Vol. III (XX) 1971

PAŃSTWOWE WYDAWNICTWO NAUKOWE

Editor in Chief — Wł. Kunicki-Goldfinger

EDITORIAL BOARD

L. Bassalik-Chabielska (Editor — Series B), Z. Kwiatkowski (Secretary), T. M. Lachowicz (Editor — Series A), E. Strzelczyk (Associate editor — Series B)

EDITORIAL OFFICE

Warszawa, Nowy Świat 67, Poland

Annual subscription price for each series is $ 6.

Payment should be made through your local book and periodical agency or directly to „Ruch" at Bank Handlowy S.A., Warszawa, Traugutta 7, Poland.

Editorial correspondence should be addressed to Redakcja Acta Microbiologica Polonica, Warszawa, Nowy Świat 67, Poland.

Ziemnicka J. see Lipa J. J. 55
Ziemnicka J. see Lipa J. J. 155
Zmysłowska I. see Zaleski S. 35

SUBJECT INDEX — SKOROWIDZ RZECZOWY

Actinophages acting upon *Streptomyces erythreus*, new variants of [B. Ostrowska-Krysiak, M. Gurkau, B. Sokołowska, D. Sikora and A. Błońska] 195

Antibiotics macrolide, NADPH — regenerating systems in microorganisms producing (J. Roszkowski, Z. Ruczaj, D. Sawnor-Korszyńska, D. Kotiuszko, H. Morawska, D. Siejko and K. Raczyńska-Bojanowska) 97

Ashbya gossypii, riboflavin biosynthesis by, I. The influence of fats of the animal origin on the riboflavin production (T. Szcześniak, L. Karabin, M. Szczepankowska and K. Wituch) 29

Ashbya gossypii, biosynthesis of riboflavin by. II. The influence of animal proteins on the riboflavin biosynthesis (T. Szcześniak, L. Karabin, M. Szczepankowska and K. Wituch) 91

L-Asparaginase production by various species of *Salmonella* (E. Kaczurba) 135

Aspergillus terreus mutants, a response to nitrite (A. Nowakowska-Waszczuk) . . . 13

Azotobacter chroococcum, the effect of some herbicides on (T. Węgrzyn) 131

Bacillus megaterium, the functioning of the membranes of the cells of mesophilic and thermophilic varieties (L. Janota-Bassalik and K. Dziechciarz) 43

Bacillus megaterium, comparing biosynthesis of vitamin B_{12} by mesophilic and by thermophilic varieties of (H. Gajcy and L. Janota-Bassalik) 215

Bacillus subtilis and *Pseudomonas* sp., stimulation of bacitracin production in the mixed cultures of (D. Styczyńska, H. Niemczyk and M. Mazoń) 69

Bacitracin production in the mixed cultures of *Bacillus subtilis* and *Pseudomonas* sp., stimulation of (D. Styczyńska, H. Niemczyk and M. Mazoń) 69

Bacterial flora of udder and the number of cellular elements in milk (Z. Ryniewicz and L. Janota-Bassalik) 117

Bioxidation of waste in activated sludge. I. Measuring oxygen respiration of activated sludge by means of polarographic and oxygen probe methods [G. Buraczewski and A. Rotowska] 121

Chlorella vulgaris Beyer and *Chlorella pyrenoidosa* Chick in permanently illuminated cultures, growth of (T. Jaroszyńska) 49

Decay index, a method for the estimation. I. Diagnostic problems concerning the biological decomposition of animal organs (S. Grys and K. Wojciechowski) 203

Erythromycin C, biosynthesis by *Streptomyces erythreus* (B. Ostrowska-Krysiak) . . 23

Escherichia coli, comparison of the effect of natural and synthetic humates and EDTA on the growth of (M. Jakubiec, E. Miszczak and J. Szczerkowska) 63

Gram-negative bacteria in lyophilized tissues of fish meat (S. Zaleski and J. Zmysłowska) 35

Herbicides, the effect of some, on *Azotobacter chroococcum* (T. Węgrzyn) 131

Krebs cycle, the ability of *Schizosaccharomyces acidodevoratus* to utilize some acids [J. Jakubowska and A. Piątkiewicz] 7

Membranes of the cells of mesophilic and thermophilic varieties of *Bacillus megaterium*, the functioning of (L. Janota-Bassalik and K. Dziechciarz) 43

Mosaic disease of cowpea (*Vigna sinensis* Savi), effect of heat on seed transmission of (V. S. Verma) 163

Propionibacterium shermanii 2, ethyl methanesulfonate (EMS) — induced mutants of (F. Pędziwiłk) 79

Pseudomonas sp. and *Bacillus subtilis*, stimulation of bacitracin production in the mixed cultures of (D. Styczyńska, H. Niemczyk and M. Mazoń) 69

Pseudomonas sp. highly tolerant to creosote, isolated from railway wood sleepers, observations on (L. Janota-Bassalik, B. Bohdanowicz-Strucińska and A. Noras) 143

Rabies, rats, caused by the short time incubation strain, seroneutralization and splenoneutralization tests in the course of (K. Wojciechowski) 167

Rabies infection in animal cerebral tissue during controlled biological decomposition, the possibilities of the detection. II. Diagnostic problems concerning the biological decomposition of animal organs (K. Wojciechowski and S. Grys) 209

Riboflavin biosynthesis by *Ashbya gossypii* I. The influence of fats of the animal origin on the riboflavin production (T. Szcześniak, L. Karabin, M. Szczepankowska and K. Wituch) 29

Riboflavin, biosynthesis by *Ashbya gossypii*. II. The influence of animal proteins on the riboflavin biosynthesis (T. Szcześniak, L. Karabin, M. Szczepankowska and K. Wituch) 91

Rumen bacteria, decomposition of pectin *in vitro*, by pure strains of (H. Tomerska) . 107

Rumen microflora, the use of dithiothreitol in *in vitro* studies on (G. M. Małuszyńska and A. Pietraszek) 171

Salmonella, L-asparaginase production by various species of (E. Kaczurba) 135

Schizosaccharomyces acidodevoratus, the ability to utilize some acids of the Krebs cycle (J. Jakubowska and A. Piątkiewicz) 7

Streptomyces aureofaciens, ultrastructure of the mycelium in the course of biosynthesis of tetracycline (W. Kuryłowicz and K. Malinowski) 1

Streptomyces aureofaciens, fatty acids of the mycelium of, during tetracycline biosynthesis (W. Kuryłowicz, K. Malinowski and W. Kurzątkowski) 179

Streptomyces erythreus, biosynthesis of erythromycin C (B. Ostrowska-Krysiak) . . . 23

Streptomyces erythreus, new variants of actinophages acting upon (B. Ostrowska-Krysiak, M. Gurkau, B. Sokołowska, D. Sikora and A. Błońska) 195

Tetracycline biosynthesis, ultrastructure of the mycelium of *Streptomyces aureofaciens* in the course of (W. Kuryłowicz and K. Malinowski) 1

Tetracycline, fatty acids of the mycelium of *Streptomyces aureofaciens* during biosynthesis (W. Kuryłowicz, K. Malinowski and W. Kurzątkowski) 179

Virus, granulosis, of cutworms *Agrotis* spp. (*Lepidoptera*, *Noctuidae*), studies on (J. J. Lipa and J. Ziemnicka) 155

Virus, nuclear polyhedrosis, from *Agrotis segetum* Schiff. and *A. exclamationis* L. (*Lepidoptera*, *Noctuidae*) electron microscopy of (J. J. Lipa, J. Ziemnicka and A. P. Gudz-Gorban) 55

Vitamin B_{12}, comparing biosynthesis of by mesophilic and by thermophilic varieties of *Bacillus megaterium* (H. Gajcy and L. Janota-Bassalik) 215
